About the Conference

The National Conference on "Health, Technology and Social Impact for Community Benefit" is designed as a unique interdisciplinary academic and professional platform bringing together experts from Medicine, Engineering, Management, Artificial Intelligence, Public Health, Health-care Technology, Pharmaceuticals and Social Innovation sectors.

Unlike conventional conferences which predominantly focus on subject specific academic presentations and credit-point acquisition, this conference is conceptualized with a broader vision to inspire students, young professionals and future innovators who will become the next generation leaders and game changers in healthcare.

The conference aims to bridge the gap between classroom learning and real-world practical wisdom by enabling participants to directly interact with accomplished academicians, clinicians, researchers, technologists and industry experts who have contributed significantly in their respective domains.

The event will focus on:

- 1) Emerging healthcare technologies
- 2) Artificial Intelligence in healthcare delivery
- 3) Telemedicine and digital health systems
- 4) Community healthcare transformation
- 5) Innovations in diagnostics and treatment
- 6) Entrepreneurship and healthcare management

Major Themes of the Conference

- 1) Healthcare & Artificial Intelligence
 - AI in diagnostics and imaging
 - Predictive healthcare analytics
 - AI-assisted clinical decision making
 - Smart hospitals and automation
- 2) Telemedicine & Digital Health
 - Remote consultations
 - Rural healthcare connectivity
 - Digital patient monitoring
 - Mobile healthcare systems
- 3) Cardiology & Critical Care
 - Modern cardiac interventions
 - Preventive cardiology
 - Technology enabled cardiac monitoring
- 4) Gastro & Lifestyle Disorders
 - Gastrointestinal health
 - Lifestyle disease management
 - Nutrition and wellness integration
- 5) Cancer Care & Research
 - Early cancer detection
 - Precision medicine
 - Technological advances in oncology
- 6) Orthopaedics & Trauma Care
 - Trauma stabilization
 - Rehabilitation technologies
 - Advanced surgical approaches
- 7) Community Health & Social Impact
 - Public health outreach
 - Rural healthcare models
 - Affordable healthcare innovations
